Healthcare and Industrial Seating from HORIZON

ESD (Electrostatic Dissipative) Seating

Horizon's ESD seating is designed for use as part of an overall ESD control program in areas where control of static electricity is crucial. ESD seating products are engineered to control discharge of static electricity by "wicking" static away from the user, sensitive electronic components and volatile chemicals and materials. ESD environments typically include wrist straps, work surfaces, footwear and flooring designed and engineered to ground and eliminate static buildup.

2000 ESD Chair Specifications

2000ESD-14 shown.
